## EDUCATION

2021 – 2024
**Ravenshaw University**
B.Sc. in Information Technology & Management

2018 – 2020
**LR DAV Public School**
12th Board

## CERTIFICATIONS

**AWS Certified Cloud Practitioner**
Amazon Web Services · 2025
via Udemy

## SOFT SKILLS

Project Management
Cross-functional Teamwork
Time Management
Critical Thinking
Effective Communication
Leadership

## LANGUAGES

## PROFILE

IT graduate with professional experience at PwC and a strong passion for building intelligent, full-stack web applications. Self-driven learner who transitioned into AI engineering — developing real-world SaaS products with integrated AI agents. Cloud certified and eager to contribute and grow at a forward-thinking organization.

## TECHNICAL SKILLS

**AI / GenAI:** AI Agents · RAG (Retrieval-Augmented Generation) · MCP (Model Context Protocol) · LLM Tool Calls · Prompt Engineering · Vector Databases

**Languages:** Python, JavaScript, Java, C, C++

**Frontend:** React.js, TailwindCSS, HTML5, CSS3

**Backend:** Node.js, Express.js, REST APIs

**Cloud:** AWS (EC2, S3, Lambda) — Udemy Certified

**Databases:** PostgreSQL (NeonDB), Oracle, ChromaDB

**Tools:** Git, GitHub, VS Code, MS Office, Postman

**Frameworks:** Google GenAI SDK, OpenRouter

**OS:** Windows, Linux (basic)

## WORK EXPERIENCE

### PwC AC (PricewaterhouseCoopers)
*Jun 2024 – Sep 2025*

Specialist – Advisory (US Healthcare)

- Managed Accounts Receivable, revenue cycle operations, and denial management for US healthcare clients, maintaining high financial accuracy and resolving high-priority insurance claims.
- Reconciled and audited payments from clients and insurance companies, maintaining records aligned with US compliance and HIPAA standards.
- Collaborated with onshore teams in a fast-paced MNC environment, demonstrating strong stakeholder communication and consistent on-time delivery.

### Career Break – Technical Upskilling
*Sep 2025 – Present*

Self-directed Learning & Project Development

- Earned AWS Certified Cloud Practitioner (Udemy) and built 2 full-stack AI-powered web applications integrating AI Agents, RAG pipelines, and MCP-based tool orchestration.

## PROJECTS

### Helper.io – AI-Powered Document Management & Learning Platform

React · TailwindCSS · Express.js · NeonDB · Google GenAI SDK · RAG · MCP

- A premium document management and learning platform where users upload notes and interact with ALKA — an in-built AI agent that summarizes content, generates quizzes, and autonomously manages files using RAG and MCP-based tool calls.
- Built on a React + TailwindCSS frontend with an Express/Node.js backend, Google GenAI SDK for LLM inference, OpenRouter for model flexibility, and NeonDB for persistent storage.

### QuickAI – AI-Powered SaaS Platform

PERN Stack (PostgreSQL · Express.js · React · Node.js) · TailwindCSS · OpenRouter · Google GenAI SDK

- A subscription-based SaaS platform offering multiple AI-powered tools — article generation, image creation, background removal, and resume analysis — built on the full PERN stack with JWT auth and tiered access control.
- Integrated Google GenAI SDK and OpenRouter for flexible multi-model AI routing; delivered a responsive React + TailwindCSS dashboard with usage tracking and upgrade flows.
