

DIPALI KAR

Full-Stack & GenAI Developer | React • Node.js • Python | RAG/MCP • GenAI SDK

PROFILE

IT graduate with professional experience at PwC and a strong passion for building intelligent, full-stack web applications. Self-driven learner who transitioned into AI engineering — developing real-world SaaS products with integrated AI agents. Cloud certified and eager to contribute and grow at a forward-thinking organization.

TECHNICAL SKILLS

AI / GenAI: Google GenAI SDK • RAG • MCP • OpenRouter • Prompt Engineering

Languages: Python, JavaScript, Java, C, C++

Backend: Node.js, Express.js, REST APIs, JWT, PostgreSQL/NeonDB, API Integrations

Databases: PostgreSQL (NeonDB), Oracle, ChromaDB

Frameworks: Google GenAI SDK, OpenRouter

Frontend: React.js, TailwindCSS, HTML5, CSS3

Cloud & DevOps: Git/GitHub, AWS EC2/S3/Lambda, Postman, API Testing, Deployment Awareness

Tools: Git, GitHub, VS Code, MS Office, Postman

OS: Windows, Linux (basic)

WORK EXPERIENCE

PwC AC (PricewaterhouseCoopers)

Jun 2024 – Sep 2025

Specialist – Advisory (US Healthcare)

- Managed Accounts Receivable, revenue cycle operations, and denial management for US healthcare clients, maintaining high financial accuracy and resolving high-priority insurance claims.
- Reconciled and audited payments from clients and insurance companies, maintaining records aligned with US compliance and HIPAA standards.
- Collaborated with onshore teams in a fast-paced MNC environment, demonstrating strong stakeholder communication and consistent on-time delivery.

Independent Research & Project Development

Sep 2025 – Present

Self-directed Learning & Project Development

- Earned AWS Certified Cloud Practitioner (Udemy) and built 2 full-stack AI-powered web applications integrating AI Agents, RAG pipelines, and MCP-based tool orchestration.

PROJECTS

Helper.io – AI-Powered Document Learning Platform

React • TailwindCSS • Express.js • NeonDB • Google GenAI SDK • RAG • MCP

[Live Demo](#) | [Repository](#)

- Built Helper.io using React, Node.js, Express, NeonDB, and OpenRouter SDK to create a premium document management and learning platform with an autonomous AI agent.
- Integrated Google GenAI SDK and MCP-based tool calls to automate content summarization, quiz generation, and file management.
- Utilized RAG to provide retrieval-augmented context for accurate AI responses.

QuickAI – AI-Powered SaaS Platform

PERN Stack • TailwindCSS • OpenRouter • Google GenAI SDK

[Live Demo](#) | [Repository](#)

- Built QuickAI using the PERN stack to deliver a subscription-based AI SaaS platform offering multiple AI-powered tools.
- Integrated Google GenAI SDK and OpenRouter to enable flexible multi-model AI routing for article generation and resume analysis.
- Implemented JWT authentication and a PostgreSQL-backed credit system to gate premium features and manage user tiers.
